

Notes for students

Based on the grades of a current and rating control, teacher deduces the grade of rating permission (ОРД), which is determined by the formula (*the formula contains Russian letters*):

$$\text{ОРД}=(\text{ОТК}*0,3+\text{РК}*0,5+\text{СРС}*0,2)$$

- ОРД is an average grade for practical lessons from the 1st to 8th weeks for specialties 051101 "Nursing", 051102 "Public health", 051105 "Pharmacy", from the 1st to 8th weeks for "General Medicine", 051302 "Dentistry";
- РК is grade of rating (midterm) control;
- СРС is an assessment of students' individual work within 8 weeks for specialties 051101 "Nursing", 051102 "Public health", 051105 "Pharmacy", within 9 weeks –for 051301 "General medicine", 051302 "Dentistry".

A student may increase his/her ОРД1 or ОРД2 during a semester, but no later than three days before the start of examination session for a good reason and when delivering a supporting document.

For this purpose you need to:

- a) Perform permission to the registrar office from a dean's office issued on the basis of the document confirming your absence in lessons for a good reason during the period of a particular ОРД;
- b) Attach a copy of the document confirming your absence in lessons for a good reason during the period of a particular ОРД;
- б) Fill out an application to the head of the sector of Registrar-office. The individual sheet that is submitted later than a specified date is not taken into account when further rating is calculated. You are allowed to take an examination in a discipline if you have a permission rating grade no less than 50%. If you do not complete the missed lessons during a semester, teacher has the right not to allow you to take an exam or test in accordance with the discipline policy.

Based on the average grade of the permission rating and the grade of exam, a final grade is calculated, which is a decisive grade for a discipline. Final grade for a discipline is determined by the formula (*the formula contains Russian letters*):

$$\text{ИО}=(\text{ОРД}_{\text{ср}}*0,6)+(\text{ОИК}*0,4)$$

In other words, we sum up 60% of average permission grade and 40% of examination grade.

Attention! If you get the grade “2” in the examination, then “unsatisfactory” grade is put on the examination sheet and the final grade is not calculated, even if you have a high grade of the average permission rating. In this case, you are included into the number of debtors and remain for a paid summer semester. Retaking of a positive examination grade in order to raise it is not permitted.

Attention! It is not enough just to pass the session with positive grades! It is necessary to gain the established transferable GPA point.

GPA (Grade Point Average) is an average weighted score of the level of academic achievements of a student in the chosen specialty. It is used for the student's transfer to subsequent courses.

For the specialties “Nursing”, “Public Health”, “Pharmacy”, “General Medicine”, “Dentistry”, AMU established the following GPA transfer point:

From 1st to 2nd year – GPA 1.33;

From 2nd to 3rd year – GPA 1.67;

The average point is calculated based on the student's final results in all disciplines according to the formula (*the formula contains Russian letters*):

$$GPA(СБ) = \frac{\sum B_i \cdot KK_i}{\sum KK_i}$$

B_i – numeric equivalent of points in a discipline

i – the number of disciplines in the curriculum for a year

KK – the amount of disciplines in credits, hours.

The average point (GPA) is calculated as the ratio of the sum of the multiplication of credits and the final grade in a discipline (in quantification) and the sum of credits for the current period of study. If you do not get the set transferable point (GPA), you have to repeat a training course.

Notes for students

Based on the grades of a current and rating control, teacher deduces the grade of rating permission (OPD), which is determined by the formula (*the formula contains Russian letters*):

$$OPD = (OTK * 0,3 + PK * 0,5 + CPC * 0,2)$$

• OPD is an average grade for practical lessons from the 1st to 8th weeks for specialties 051101 “Nursing”, 051102 “Public health”, 051105 “Pharmacy”, from the 1st to 8th weeks for “General Medicine”, 051302 “Dentistry”;

• PK is grade of rating (midterm) control;

•CPC is an assessment of students' individual work within 8 weeks for specialties 051101 "Nursing", 051102 "Public health", 051105 "Pharmacy", within 9 weeks –for 051301 "General medicine", 051302 "Dentistry".

A student may increase his/her ОРД1 or ОРД2 during a semester, but no later than three days before the start of examination session for a good reason and when delivering a supporting document.
